}
```

Output:

Responsive Grid Layout Task:

Explanation:

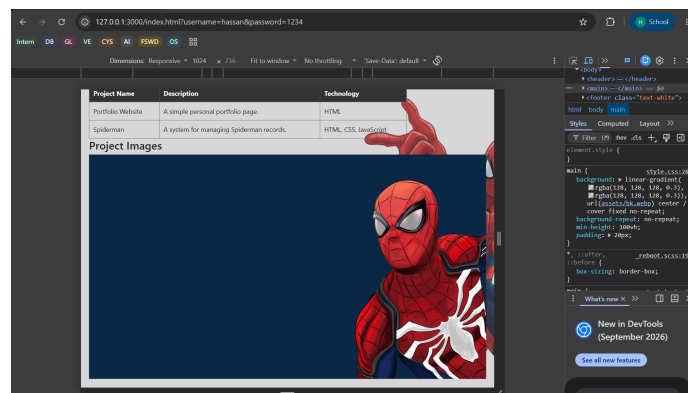

Bootstrap divides a webpage into a 12-column grid. We decide how many of these columns an element should occupy at different screen sizes. In my code I have used;

class="col-4 col-md-6 col-lg-12"

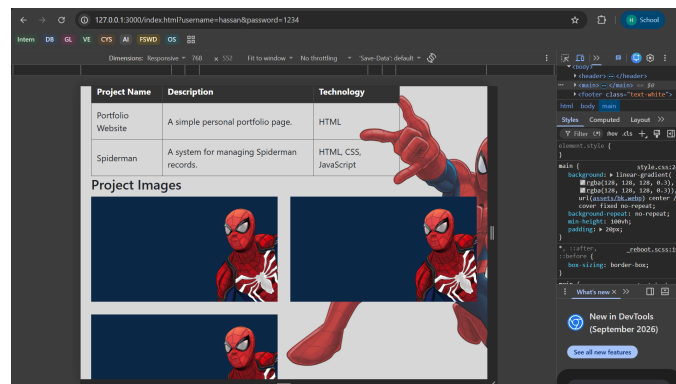

This means that on small screens like mobile phones 4 columns out of 12 (col-4) will be used by one card (image), one medium screens like tablets 6 columns out of 12 (col-md-6) will be used and for large screens like desktops 12 columns out of 12 (col-lg-12) will be used. And to change this process we just have to adjust the allocated size for each card.

Output:

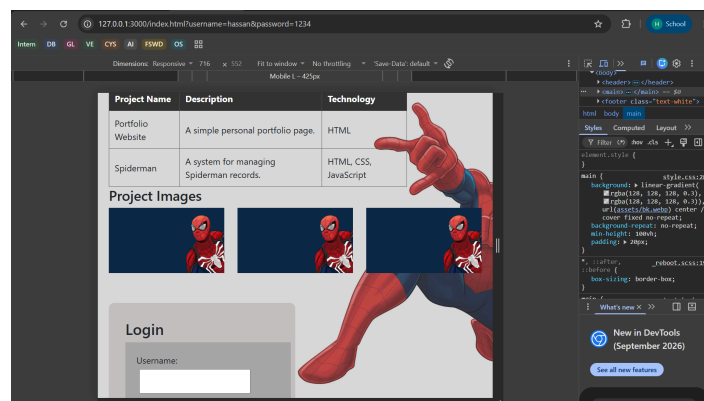

Desktop:

Tablet Screen:

Mobile Screens:

Home Task: Index.html:

```
